Hi ! I will give you a list of words with the expected output, I want you to guess the rule. Can you do it ?

Sure, I'd be happy to try! Please go ahead and provide the list of words along with their expected outputs.

forward,w ; competitors,s ; protagonist,o ; courage,a

Based on the provided examples, here are the words and their expected outputs:

1. forward -> w
2. competitors -> s
3. protagonist -> o
4. courage -> a

Let's analyze these examples:

1. **forward**: The second letter from the end is "w".
2. **competitors**: The second letter from the end is "s".
3. **protagonist**: The second letter from the end is "o".
4. **courage**: The second letter from the end is "a".

The pattern appears to be: The output is the second letter from the end of the input word.

Is this the rule?
